

Amit Sain

B.Tech Computer Science (2026)

Dear Hiring Team,

I am excited to apply for the DevOps Intern position at MatchBest. As a Computer Science graduate with hands-on experience in cloud deployment and modern development tools, I am eager to begin my career in DevOps.

During my personal projects, I deployed full-stack MERN applications on AWS EC2 using Docker, configured Linux servers, managed application deployment, and worked with Git for version control. These experiences strengthened my understanding of cloud infrastructure, containerization, and deployment workflows.

I am familiar with Linux, Docker, AWS, Git, CI/CD concepts, and Jenkins fundamentals, and I have basic knowledge of Kubernetes. I am enthusiastic about learning infrastructure automation tools such as Terraform and Ansible and applying DevOps best practices in a professional environment.

I am a fast learner, enjoy solving technical challenges, and work well in collaborative teams. I would be grateful for the opportunity to contribute to MatchBest while continuing to develop my DevOps skills.

Thank you for your consideration. I look forward to the opportunity to discuss my application.

Sincerely,

Amit Sain
