

Dear Hiring Manager,

I am excited to apply for the Associate Software Engineer position. I recently completed my Bachelor's degree in Computer Science and have developed a strong foundation in software development, data structures, algorithms, and web technologies.

During my LLM Post-Training Internship at Ethara AI, I worked on data annotation, prompt engineering, model evaluation, and improving AI-generated responses. This experience enhanced my problem-solving abilities, attention to detail, and understanding of modern AI systems.

In addition, I have built full-stack web applications using HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB. My academic background and project experience have strengthened my knowledge of object-oriented programming, database management, software engineering principles, and algorithmic problem-solving.

I am a quick learner, highly motivated, and passionate about building scalable and efficient software solutions. I am eager to contribute to your engineering team while continuing to grow my technical and professional skills.

Thank you for considering my application. I look forward to the opportunity to discuss how my skills and enthusiasm can contribute to your organization.

**Sincerely,
Amit Sain**
