PROFESSIONAL SUMMARY

Results-driven **Full Stack Developer (MERN)** with hands-on experience architecting and deploying production-grade web applications. Proficient in **Node.js, Express.js, React.js, and MongoDB** with strong command of **JWT authentication, RBAC, REST APIs, AWS EC2, Docker, and CI/CD pipelines**.

WORK EXPERIENCE

LLM Post Training Intern

Ethara AI

Mar 2026 – May 2026

Remote

- Contributed to **LLM post-training workflows** by analysing model responses, improving prompt quality, and validating AI-generated outputs for accuracy, relevance, safety and achieved **100%** task completion rate, demonstrating strong consistency and learning ability
- Assisted in enhancing model performance through **data annotation, response evaluation, and feedback optimization**, ensuring higher quality conversational AI interactions aligned with user requirements.

Web Developer Intern

Cognifyz Technologies

Oct 2025 – Nov 2025

Remote

- Architected and delivered a secure **company authentication dashboard** using **HTML, CSS, JavaScript, Node.js, Express.js, and MongoDB** — covering login, signup, session management, and protected route handling with **server-side validation**.
- Ensured clean separation of concerns between frontend UI and backend API layers, enabling maintainable and scalable code structure aligned with industry best practices.

Java Developer Intern

Codtech IT Solutions Pvt. Ltd.

Jun 2025 – Aug 2025

Remote

- Engineered a **multithreaded client-server chat system** using Java Sockets and OOP principles, and built a REST API client for third-party HTTP endpoints — directly applicable to backend microservice and fintech API patterns.
- Developed a **product recommender system** leveraging hash maps and trees, reinforcing core DSA and OOP skills with real-world application in recommendation engine design.

PROJECTS

Document Signature SaaS Platform · React.js, Node.js, Express.js, MongoDB, JWT

Mar 2026

- Built a production-ready **document signing SaaS platform** enabling secure PDF uploads, canvas-based digital signature capture, and seamless document signing through an intuitive React interface.
- Implemented **JWT-based authentication** with **role-based access control (RBAC)** to secure user sessions and document access, improving application security and preventing unauthorized operations.
- Engineered **RESTful APIs** using **Node.js, Express.js, and MongoDB** for document management, signature processing, and user workflows, ensuring scalable backend architecture and smooth frontend integration. [[Live](#)]

Team Task Manager · React.js, Node.js, MongoDB, RBAC, JWT, AWS EC2, Docker

Dec 2025

- Developed a full-stack **task management application** with separate Admin and Member dashboards, enforcing **role-based access control (RBAC)** via **JWT** so each role sees only permitted actions and data.
- Designed scalable **REST APIs** for project, task assignment, status tracking, and team collaboration, enabling efficient communication between the React frontend and backend services.
- Containerized the application with **Docker** and deployed on **AWS EC2**, achieving isolated, reproducible, and horizontally scalable production deployment. [[Live](#)]

ResumePro — Resume Builder with ATS checker · HTML, CSS, JavaScript, Node.js, REST APIs

Sep – Nov 2025

- Developed an AI-powered ATS Resume Builder with **real-time preview, multiple templates, and automated PDF generation**, reducing resume creation time from **20–25 minutes to under 10 minutes**.
- Integrated **OpenAI APIs** to perform ATS analysis, keyword optimization, and personalized resume feedback, increasing resume quality and ATS compatibility.
- Implemented robust **server-side validation and dynamic template rendering**, reducing manual formatting effort by **40%** and significantly improving output consistency across different browsers and screen sizes. [[Live](#)]

TECHNICAL SKILLS

Frontend: React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS, TypeScript

Backend & APIs: Node.js, Express.js, RESTful API, JWT Auth, Role Based Access Control

Databases: MongoDB, SQL

Cloud & DevOps: AWS (EC2, IAM, S3, RDS, CloudFront, Route 53, API Gateway, Lambda), Docker, Kubernetes, Jenkins (CI/CD), Linux

Languages & Tools: JavaScript, Java, Python, C/C++, OOPS, Git, GitHub, VS Code, Linux CLI, Netlify, Vercel, Railways, Render

EDUCATION

B.Tech — Computer Science & Engineering | CGPA: 9.3 / 10.0

Laxmi Devi Institute of Engineering and Technology, Alwar, Rajasthan

2022 – 2026

CERTIFICATIONS

Full Stack Web Developer | Data Structures and Algorithms | Docker | AWS Cloud Practitioner
