

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer (MERN) specialising in the design, planning, and product development of scalable web applications. Delivers responsive, user-interface-focused websites using Node.js, Express.js, React.js, and MongoDB with JWT auth, RBAC, and RESTful APIs — from architecture through AWS EC2 and Docker deployment.

WORK EXPERIENCE

- LLM Post-Training InternEthara AI | RemoteMar 2026 – May 2026
 - Improved model output quality 25% vs. benchmarks by debugging 500+ AI-generated responses — identifying accuracy, relevance, and safety regressions across evaluation pipelines.
 - Cut team review cycle 30% through standardised evaluation criteria and version-controlled annotation guidelines, strengthening cross-functional collaboration.
 - Drove post-training pipeline improvements via data annotation, response scoring, and feedback loops aligned to performance optimisation and product requirements.
- Web Developer InternCognifyz Technologies | RemoteOct – Nov 2025
 - Delivered a production-ready authentication web application (zero unauthorised-access incidents) — responsive user-interface UI across all device breakpoints with protected routing and server-side validation.
 - Boosted website codebase maintainability 40% in code review by enforcing clean frontend/API separation, enabling horizontal scalability with minimal onboarding overhead.
- Java Developer InternCodtech IT Solutions Pvt. Ltd. | RemoteJun – Aug 2025
 - Cut inter-service latency 20% vs. single-threaded baseline by engineering a multithreaded Java Socket chat system — directly applicable to microservice and fintech API patterns.
 - Raised product recommender hit-rate 35% via hash-map/tree engine, presenting performance findings in weekly team collaboration reviews.

PROJECTS

- Document Signature SaaS PlatformReact.js | Node.js | Express.js | MongoDB | JWTMar 2026
 - Boosted security pipeline 30% via JWT auth + RBAC; built responsive user-interface UI with canvas-based e-signature, scalable RESTful API contracts supporting future third-party website integrations. [Live]
- Team Task ManagerReact.js | Node.js | MongoDB | RBAC | JWT | AWS EC2 | DockerDec 2025
 - Planned and developed a full-stack RBAC web application deployed on AWS EC2 with Docker — isolated, reproducible, horizontally scalable production deployment with Admin/Member dashboards. [Live]
- ResumePro — ATS Resume BuilderHTML | CSS | JavaScript | Node.js | REST APIsSep – Nov 2025
 - Reduced manual website formatting effort 40% with an ATS-optimised, responsive web design builder on Render — real-time preview, server-side validation, and dynamic template rendering across browsers. [Live]

LEADERSHIP & ACHIEVEMENTS

- Smart India Hackathon — Team Lead & Backend DeveloperInter-College
 - Led cross-functional team to plan, design, and ship a Health Disease Prediction web application (Python/Flask) — trained supervised ML models on 100K+ patient records for real-time scalable multi-disease classification.

TECHNICAL SKILLS

- Frontend:React.js, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Tailwind CSS
- Backend:Node.js, Express.js, RESTful APIs, JWT Auth, RBAC
- Databases:MongoDB, SQL
- Cloud & DevOps:AWS (EC2, IAM, S3, RDS), Docker, Kubernetes, CI/CD, Linux
- Languages:JavaScript, Java, Python, Git, GitHub

EDUCATION

- B.Tech — Computer Science & Engineering
- Laxmi Devi Institute of Engg & Technology, Alwar
- CGPA: 9.3 / 10.0 | 2022 – 2026

CERTIFICATIONS

- Full Stack Web Developer
- Data Structures & Algorithms
- Docker | AWS Cloud Practitioner
